About Me

- **Over 6 years** of hands-on experience in software engineering.
- Proficient in **Java, Spring Boot, JPA, Microservice REST, AWS**, and other technologies.
- Skilled in developing robust applications and ensuring seamless deployment on cloud like **AWS and Fire-Base**.
- Strong problem-solving abilities with a passion for tackling complex challenges.
- Proven track record in handling various stages of the software development lifecycle.
- Dedicated to driving innovation and delivering high-quality solutions.
- Committed professional with a focus on continuous improvement and learning.

My Tech Stack

Technical Skills Tools

Java & Spring-Boot, JPA, Nodejs, SQL, AWS, Angular, Microservices, REST
Maven, Gradle, Git, Splunk, Jenkins

Work History

Kyndryl PVT Ltd (Sr. Associate Software Engineer)

July'22 – July'24

Project Name – HWSW

- Skilled in **troubleshooting technical problems** and implementing effective solutions to minimize downtime
- Experienced in **monitoring application performance and conducting regular maintenance** tasks to optimize efficiency
- Collaborate closely with development teams to identify root causes of issues and implement long-term fixes
- Responsible for **incident management, including ticket resolution, escalation, and communication** with other teams.
- Perform regular **system checks and audits to ensure compliance** with security and regulatory standards

Tech-Stack: IBM-ETL, ServiceNow, Ansible, DB2, IBM Event Stream

Project Name – BCOVT

- Developed a web application for efficient claims and insurance processing.
- Implemented Excel file conversion into payloads through 5 key components.
- Deployed the application on **OpenShift for scalability and traffic management**.
- Enhanced **API security with LDAP + OAuth** integration.
- Utilized Axway engine for effective traffic management among APIs.

Tech Stack - Spring Boot · MyBatis · DB2 · OpenShift · Angular 12

Seligent (Full Stack Java Dev)

Sep'20 – July'22

Project Name – Service Engagement

- Managed Seligent application administration, including **user management, project setup, and configuration**.

- Provided technical support and troubleshooting for Seligent users, ensuring smooth operation and issue resolution.
- Conducted **training sessions for new users** and provided ongoing support and guidance.
- Collaborated with stakeholders to gather requirements and implement app enhancements and customizations.
- Created and maintained dashboards and reports to track project progress and metrics.
- Ensured compliance with best practices and security standards in Engagement configuration and usage.

Tech Stack -> NodeJs · Express · MongoDB · AmazonS3 · Angular 10 · Elastic Search · AWS EBS

Project Name – SCIP

- Developed SCIP web application for KONE Corp. using **Spring Boot, JPA, pgsql, Angular**
- Integrated **Amazon S3, Azure AD, and Elastic Beanstalk** for seamless functionality
- Enables visualization of business flow and detailed info on Substances of Concern in Products
- Allows users to upload files for substance and article data
- Implemented robust security using **Spring Security, Azure AD, and MSAL authorization**
- Utilized IUCLID machine for data verification, storing processed and raw files on Amazon S3

Tech Stack -> Spring Boot · JPA · PgSql · Angular · AmazonS3 + Azure AD + EBS

ADP PVT Ltd (Member Technical)

Aug'18 – Aug'20

Project Name – Career Connect

- Developed internal email application for organization carriers to facilitate seamless communication.
- Enables users to send emails to clients, manage contacts, and establish direct client associations.
- Stores email history for carriers, clients, and users, allowing deletion based on user preference.
- Utilized **Amazon S3** for attachment and email storage.
- Implemented **Apache Kafka's Kafka Connect API** for seamless data streaming.

Tech Stack -> Spring Boot · JPA · Hibernate · Oracle · Angular · Kafka · Amazon S3

Project Name – IS-Event Manager Framework 2.0

- Developed specialized division within **IS-App application to display client-triggered events**.
- Offers seamless and user-friendly interface for easy navigation.
- Implemented individual **client timelines for tracking activities and events**.
- Processed events from various systems within the insurance division through Event Framework.
- Distributed events to timelines and RED servers for efficient management.
- Created **Splunk dashboard** to log event framework data and provide valuable insights.

Tech Stack -> Spring Boot · JPA · Hibernate · Oracle · Angular. Elastic Search

Education

National Institute of Technology, Prayagraj

Prayagraj, 2018

- Master of Computer Applications
- CGPA 7.54

BNMU, Madhepura

Saharsa, 2015

- Bachelor of Computer Applications
- Percentage 78.90
